Statement of Stability and Uniformity

Soybean variety CX351 has been judged to be uniform for breeding use and testing after six generations of selfing. CX351 was reproduced and judged uniform and stable for an additional three generations.

Statement of Variants

CX351 shows no variants other than what would normally be expected due to environment or that would occur for almost any characteristic during the course of repeated sexual reproduction.

EXHIBIT B

Statement of Distinctness

CX351 most closely resembles CX329; however, CX329 is resistant to Race 4 phytophthora root rot and has shiny seed coat luster whereas CX351 is susceptible to Race 4 phytophthora root rot and has dull seed coat luster.
